

## 2U Telescopic Rail / Angled - Patch & Splice Management Panels

Front Patching Shelves are used to terminate and distribute optical fiber cables, termination box has 24 or 48 ports (from 24 fibers to 96 fibers). They are convenient equipment to organize and connect the fiber optic links. It is suitable for the use in telecommunication network, central office optical cable system and premise fiber networks.

Typical type of our fiber patch panels are rack mounted, they are with optional different kinds of fiber optic adapters ports and pre-installed inner trays and accessories, optional pigtailed with different types, common style is SC/FC/ST/LC, E2000 types can be custom made based on quantity

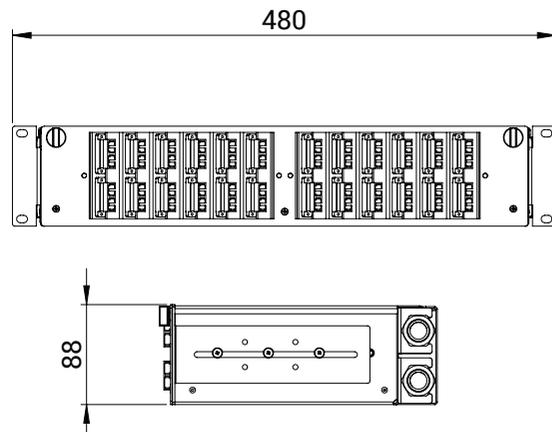

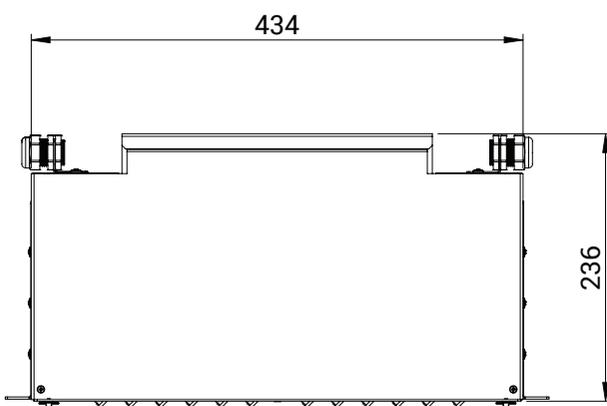

### Features

- Easy time-saving installation
- Telescopic Rail System
- Angled Front Panel
- Different front panel options
- Compact and safe design
- Rear cable entry
- Captive Panel Screws ensure easy/safe locking of the drawer
- Easy connector and cable accessibility
- Bend radius protection

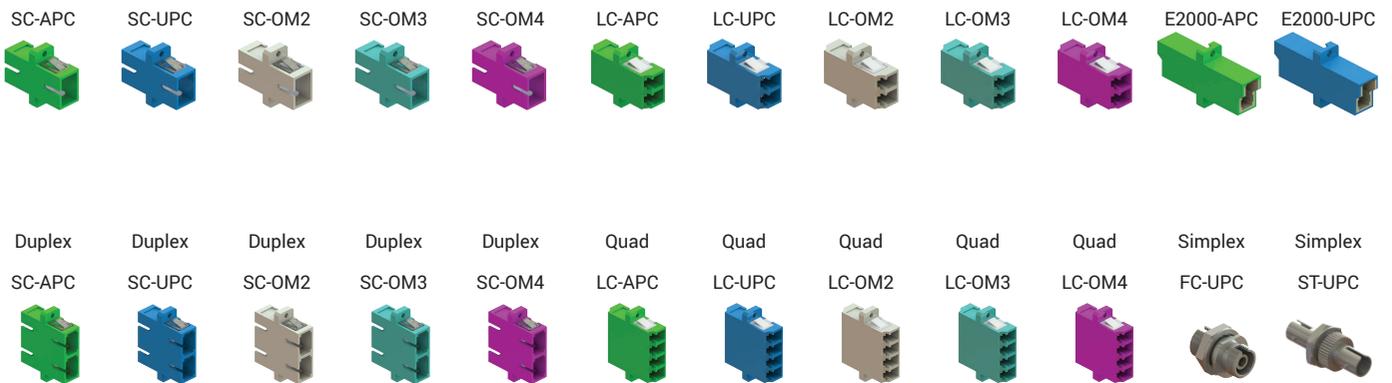

### Dimensions
